Electric Department

Clean Energy Program BINGO

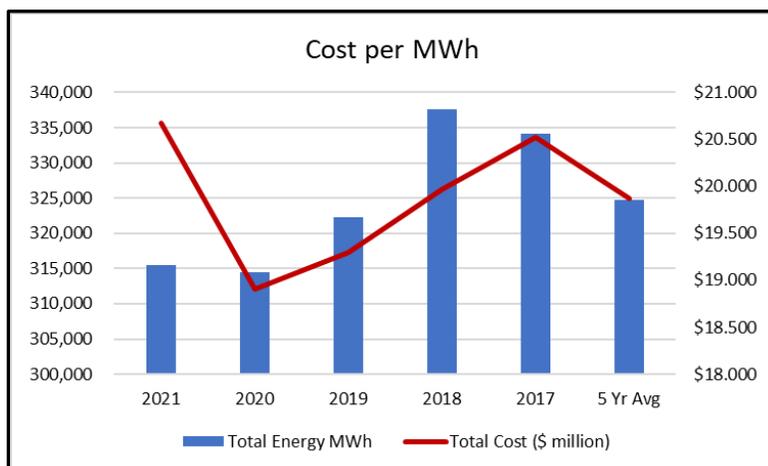

On Tuesday, February 22nd, utility staff partnered with the Division on Aging to present information about the path for a new Clean Energy Program for Bay City Electric Light & Power's Energy Smart Program. Attendees were given information about MI PowerGrid and asked to provide feedback on what they feel would be important to see as part of Bay County's clean energy goals. Utility staff facilitated a bingo where attendees could win energy efficiency prizes as an incentive for participating.

As a reminder, staff is still gathering information to lay out the long-term strategic plan for a Bay City Electric Light & Power Clean Energy Program. Staff encourages everyone, if you haven't already submitted your thoughts, please scan the QR code or go to www.BayCityEnergySmart.org and click on CEP Survey to let us know what you think.

Purchased Power

Procurement of power is the single largest expense for Bay City Electric Light & Power. There are many components behind the decision-making process and efforts to stabilize costs. A few of the components the utility utilizes are bilateral contracts, capacity options, spot market monitoring and local generation.

The cost of fuel, unplanned repairs on investments, and supply chain issues have had an impact on the cost of purchased power. The graph shows a five-year history for the cost of purchased power by megawatt hour (MWh).

Public Safety

Fire Operations Division:

On Friday, February 18th, at approximately 9:08 p.m., the Bay City Department of Public Safety was dispatched for a mutual aid call to 1392 South Valley Center Drive in Monitor Township. Upon arrival crews found a large single-story commercial building with heavy fire coming from the structure. 1 Aerial was utilized in the extinguishment of the fire. Once the fire was out, 1 Aerial and crew cleared the scene without incident.
