## Crimson King Maple

*Acer platanoides*

**DESCRIPTION:** 45' tall x 30' wide. Popular for its purple-green foliage throughout summer. Leaves turn brown, dark maroon, or bronze in the fall before dropping. The oval to rounded crown fills with maroon-yellow flowers in the spring.

## Autumn Blooming Cherry

*Prunus subhirtella 'Autumnalis'*

**DESCRIPTION:** 35' tall x 35' wide. Double-flowered tree. Usually with a multiple trunk, slender, upright branches, and a rounded canopy. The canopy on older trees often grown wider than the tree grows tall. Before leaves appear in the spring, the trees are covered with many semi-double pink flowers; some flowers may also appear in the autumn if the weather is sufficiently warm. The one to four-in-long dark green leaves are later joined by the appearance of small, black berries.

# Tree Planting Options

## City Sprite Zelkova

*Zelkova serrata*

**DESCRIPTION:** 24' tall x 18' wide. Compact, dense, and semi-dwarf, this is the perfect little tree for tight urban spaces. Summer foliage appears brighter green than typical Zelkova. Short internodes, fine textured foliage, and a self pruning growth habit promise a low maintenance city tree.

## Japanese Lilac

*Syringa reticulata*

**DESCRIPTION:** 30' tall x 15' wide. Its upright habit varies from symmetrical to irregular. The huge clusters of creamy white flowers, borne in early summer for about two weeks, are the main ornamental feature but lack the fragrance of the spring-blooming Lilacs. Green fruit clusters are somewhat showy when viewed from close range.

## Fireburst Paperbark Maple

*Acer griseum*

**DESCRIPTION:** 25' tall x 18' wide. Superior branch structure, upright and uniform shape, predictable performance and speedy growth are among attributes of this Paperbark Maple cultivar. Bark coloration and exfoliating character are outstanding, as is the quality of dark green foliage that turns brilliant red in autumn.
